E-mail Address

Northwest Missouri Cellular Limited Partnership - roger@nwmcell.com

Kurtis & Associates, P.C. - mkurtis@kurtispc.com

Section 2**Local Area 911 Implementation**

List all individual local areas covered by this report (e.g., Lee County, Virginia):

Atchison County, Missouri (FIPS Code 29005)

Worth County, Missouri (FIPS Code 29227)

For each area listed above, identify the emergency response point to which calls are now being routed.

Atchison County, Missouri -

Northwest Missouri Cellular Limited Partnership ("NWMO") has five cellular towers located in Atchison County, Missouri (Watson, Rockport, Tarkio, Blanchard, and Dotham.) Basic 911 calls captured on the Watson, Rockport, Tarkio, and Blanchard towers are routed to ACCentral, the Atchison County PSAP. The Dotham tower lies just inside the extreme eastern border of Atchison County, just inside the border line Atchison County shares with Nodaway County, Missouri. ACCentral and the Nodaway County Sheriff's Office (the Nodaway County PSAP) are aware of this situation and have requested that basic 911 calls captured on the Dotham tower be routed to the Nodaway County Sheriff's Office, which then communicates with ACCentral or the appropriate local emergency authority in Atchison County on behalf of the callers. The Missouri 911 Administrative Office is also aware of this situation.

In addition, it is possible that NWMO's Corning tower in Holt County, Missouri (to the south of Atchison County) will capture some of the basic 911 traffic originating in Atchison County. The Holt County Sheriff's Office, the PSAP for Holt County, Missouri, and the Atchison County PSAP are aware of this situation. Basic 911 calls made in NWMO's service area in Atchison County that are captured by the Corning tower are routed to the Holt County Sheriff's Office, which then forwards the calls to ACCentral, or communicates with the appropriate local emergency authority in Atchison County on behalf of the callers.

Worth County, Missouri -

No PSAP exists in Worth County. Instead, the Missouri 911 Administrative Office designated the Gentry County Emergency Dispatch, the PSAP for Gentry County, as the appropriate PSAP to receive wireless basic 911 calls made in Worth County, Missouri. While NWMO's service area covers parts of Worth County, NWMO does not have any cellular towers located in the county itself. NWMO's coverage area in Worth County is mainly supported by its Stanberry tower physically located in Gentry County, Missouri (which is to the south of Worth County.) Basic 911 calls made in NWMO's service area in Worth County that are captured by the Stanberry tower are routed to the Gentry County PSAP which then forwards the calls to the Worth County Sheriff's Office, or communicates with the appropriate local emergency authority in Worth County on behalf of the callers.

In addition, it is possible that NWMO's Maryville, Downtown Maryville and South Maryville towers in Nodaway County, Missouri (to the southwest of Worth County) will sustain a minimal amount of mobile capture from a few scattered areas in Worth County. Basic 911 calls made in NWMO's service area in Worth County that are captured by these towers are routed to the Nodaway County Sheriff's Department, one of three PSAPs in Nodaway County. The Nodaway County Sheriff's Department forwards the calls to the Worth County Sheriff's Office, or communicates with the appropriate local emergency authority in Worth County on behalf of the callers.

Section 3**Certification - To be signed by an authorized representative of the reporting entity**

I certify that I am an authorized representative of the above-named reporting entity, that I have examined the foregoing report and to the best of my knowledge, information and belief, all statements of fact contained in this form are true and that the reporting entity has completed the steps necessary to properly route 911 emergency calls in the localities covered by the report as of September 11, 2002.
